

MEET OUR EXPERTS

Prof. Dr. Katja Nelson

Prof. Dr. Benedikt Spies

Prof. Dr. Tabea Flügge

PD Dr. Tobias Fretwurst

Dr. Florian Kernen

MDT Siegbert Witowski

Learning Objectives

- How to use digital scan and impression devices most effectively and how to match their data for accurate case planning.
- How to use digital devices and aids for guided implantology in practice.
- How to plan cases of varying complexity using backward planning.
- How to prevent patients from periimplantitis and how to recognize and treat it correctly in case of an infection.
- How to get more bone for the implant bed with different augmentation methods.

OVERVIEW

Master the Digital Workflow in reconstructive dentistry. The course consists of 4 virtual classroom webinars and 4 days of on-site training at the University of Freiburg, Germany.

Participate in evidence-based lectures and practical exercises presented by experienced speakers and instructors from the University of Freiburg, Germany.

VIRTUAL CLASSROOM

4 Monday evenings, September 6th, 13th, 20th and 27th

18:30–19:30 CET (Central European Time)

Live Presentation including 15 min questions & answers

Prior to the 4-day on-site course at the university, 1 hour webinars will be held on four consecutive Monday evenings to introduce you to the topics. With your registration you will receive access to all four live webinars with the following content:

Webinar 1

Prof. Spies and Dr. Kernén

Planning and treatment of simple cases using IOS, CBCT and planning software

Webinar 2

Prof. Spies and Dr. Kernén

Planning complex cases using IOS, CBCT, EOS and planning software

Webinar 3

Prof. Nelson and PD Dr. Fretwurst

Basic implant surgery

Webinar 4

Prof. Nelson and PD Dr. Fretwurst

Advanced implant surgery: bone grafting and soft tissue management, tension-free closure

ON-SITE TRAINING, UNIVERSITY OF FREIBURG, GERMANY

4 Days – Wednesday to Saturday, October 6th–9th, 2021

Day 1 – Wednesday, October 6th, 8:30–17:00

Prof. Spies, Prof. Flügge, Dr. Kernén and MDT Witkowski:

Lecture

- Digital workflow in implant dentistry – Overview
- Prosthodontic concepts – choice of materials

Interactive case discussion

- Data acquisition – CBCT / Intraoral scanning
- Backward planning of simple and advanced cases

Day 2 – Thursday, October 7th, 9:00–17:00

Prof. Spies, Prof. Flügge, Dr. Kernén and MDT Witkowski:

Lecture

- Virtual implant planning and guided surgery
- Data acquisition – Intraoral scanning in complex cases / Extraoral scanning

Interactive case discussion

- Backward planning of complex cases

Hands-on

- 3D Printers and milling units
- Implant planning software SMOP
- Intra-Oral Scanners
- Implant planning software Implant Studio

Day 3 – Friday, October 8th, 8:30–17:00

Lecture

- Risk patients and basics in implant surgery
- Advanced surgery – augmentation procedures
- Periimplant disease – prevention and implant uncovering

Live surgery

- Basic implant placement

Interactive case discussion

- Sinus floor elevation

Day 4 – Saturday, October 9th, 9:00–14:00

Lecture

- Bone block and bone splitting techniques

Hands-on

- Bone block exercise
- Guided surgery on the model: incision, guided implant insertion, suturing

Tour through the university clinic and the operating room: discussion of surgical instruments (Nelson-set, sinus lift, block, piezo, osteotomes, bone-split and tunneling instruments)

14:00 End of course
